“100% Breast Surgical Services with Dignity and Detail”

As a breast expert, Dr. April Speed provides 100% breast services to women, men and adolescents. Receiving the prestigious Susan G. Komen-sponsored Breast Fellowship at MD Anderson Cancer Center in Houston, Texas (which is a top-ranked cancer center by *US News and World Report*), Dr. Speed was exposed to numerous advanced breast surgical oncology techniques such as oncoplastics (example: nipple and skin-sparing mastectomies), cutting-edge cancer research and publication opportunities. This Fellowship promoted comprehensive breast cancer treatment plans using a multidisciplinary model. This model is a patient-centered approach to breast cancer management involving integrating primary care, medical oncology, radiation oncology, plastic surgery and pathology expertise to formulate the best possible plan for each unique patient. One patient, one place, one plan! While at MD Anderson, Dr. Speed further developed proficiency in promoting breast cancer awareness through community outreach, advocacy, prevention and education through the Susan G. Komen component of her Fellowship and is currently on the Board for Susan G. Komen Atlanta, Affiliate. Dr. Speed believes in providing breast care with dignity and detail.™
